

APPS FOR GLASS

01/05/15

GLASS

Travel:

Navigate the city like a local with curated, guided tours from National Geographic and be alerted of interesting information along your way. Save your favorite places to your own itinerary and share it.

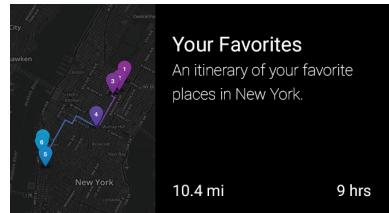

1. Key Features:

- Explore the city with curated, guided walking tours of interesting waypoints and city secrets.
- Get alerted as you approach each waypoint and hear interesting information about your surroundings read aloud.
- Easily navigate between waypoints and pick up where you left off anytime from the Glass timeline.

Hiking:

Easily track and share your favorite routes, learn about the environment around you and be sure to get back before the sun goes down.

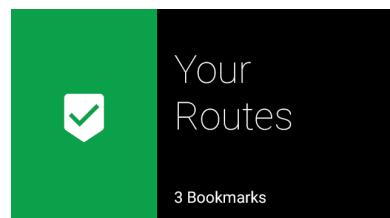

1. Key Features:

- a. Locate nearby trails within your skill level and explore the waypoints with photos and maps
- b. Track your own trail and add waypoints as you go to share with your friends and the community.
- c. Get relevant alerts about sunlight remaining, weather changes and which way to go at forks in the road.

Fishing:

An angler's companion app to log and share every catch with easy species ID, map your favorite hot spots, connect to onboard fishfinder and stay informed of changing conditions and regulations.

1. Key Features:

- Create a record of each catch including location, conditions, pictures, notes, and even let Glass identify the species of fish you caught.
- See maps and directions to each hot spot and then find exactly where your catches were within that spot. Share your hot spots with your Google+ friends if you choose.
- Connect to your bluetooth sonar fishfinder to see the bottom structure, get alerts when fish are nearby and keep your eyes on the water.
